Understanding the Hybrid Nature of the York Pension Plan
Hybrid – What does it mean

- Two calculations are done
  - Defined Benefit (Minimum Guarantee Pension - MGP)
  - Defined Contribution (Money Purchase Component - MPC)

- If the Minimum Guarantee Pension is greater than the Money Purchase Component
  - The Money Purchase Component is paid plus a Supplementary Pension equaling the Minimum Guarantee Pension
  - If the Money Purchase Component is greater than that value is paid.

These calculations provide you with the NORMAL FORM of the pension.

Minimum Guaranteed Benefit

• Mathematical Calculation

**Final Average Earnings (FAE)** - are based on your five years of highest earnings. The years do not have to be consecutive and a year is determined in 12-month blocks from the retirement date back.

The YMPE is the dollar amount set each year by the Canada Revenue Agency (CRA) which determines the maximum amount on which to base contributions to the Canada Pension Plan (CPP).

Credited Service is the total number of years of Plan membership. You can’t obtain credit for a full year if contributions by either you or the University are not maintained at the full rate for that year. In that case, you would be credited with a fraction of a year.

\[
\text{1.4\% of your final average earnings at retirement up to the average YMPE for those years} \quad \text{PLUS} \\
\text{1.9\% of your final average earnings at retirement above the average YMPE for those years} \quad \text{MULTIPLIED BY} \\
\text{Your credited service}
\]
Money Purchase Pension

- Provides you with a benefit based on the accumulated contributions and investment earnings of your account balance. The amount of benefit earned depends on how well the investments in the fund perform and other factors such as your age, your marital status and the age of your spouse at retirement.

- This calculation will be subject to market fluctuations.
